

New era
in management
and controlling

Opportunities and solutions

47th Congress of Controllers
May 15-16, 2023, Munich

Register now!

Using the new era for change: Good helmsmen and helmswomen also learn in the storm

47th Congress of Controllers again as a face-to-face event in Munich / Lectures, topic clusters and experience exchange offer a head start in knowledge

The new era does not stop at controlling. The 47th ICV Congress of Controllers is therefore once again tackling the current challenges. The annual highlight of the European controlling events on May 15/16 in Munich: dealing with cost and price increases, corporate planning in uncertain and volatile markets and climate change, "in which we must not lose any more time".

This is how the ICV Chairman Prof. Dr. Heimo Losbichler summed up the Congress focus 2023. Under the motto "New era in management and controlling. Opportunities and solutions", those responsible at the ICV also make it clear to everyone involved in the corporate management environment after the difficult previous years: "Crises and upheavals always offer great opportunities - and the good helmsman or the good helmswomen can only be recognized in the storm". Heimo Losbichler therefore recommends, in addition to exchanging experiences, securing a knowledge advantage in the area. And invites you to the tried and proved controlling Congress.

The focus of the two event mornings will be on keynotes and lectures. In the afternoon, different focal points are set in the parallel topic clusters. "Cost and price management in the stagflation environment" offers lectures on the controlling roadmap in inflation, on modern corporate planning and on resilient supply chains; "Successful sustainability controlling in practice" shows how sustainability goals are implemented at the Swiss Emmi Group. The technological change towards sustainability is presented using the example of the car industry. The path from non-financial reporting to proactive sustainability performance management can also be followed and understood in the lecture.

The third topic cluster of the 47th Congress of Controllers deals in detail with the question of whether planning has to say goodbye to old habits. Supporting software solutions are presented as well as findings from a survey on planning practice. Visitors will also learn how to generate a competitive advantage with planning and forecasting.

The morning lectures are dedicated to "Better growth" - the pursuit of commercial excellence in all areas, as well as transformation, shown on the "giant" Deutsche Bahn AG and based on experiences and insights from medium-sized companies: How transformation is understood as a constant and integrated in the CFO agenda as an indispensable basis to "put the horsepower on the road". The role of controlling in view of the change in strategy and culture in business transformation is also highlighted.

The focal points of cost and price management as well as sustainability from the topic clusters appear again in the lectures on sustainability at Telefónica and a lecture on price developments and inflation, taking into account the influence of geopolitical factors, cost levers, the role of controlling and the value of digital tools. The visitors of the Congress will also learn how to actively shape the energy turnaround and how to translate the strategy into performance measurement.

The last lecture at the Congress of Controllers is traditionally less devoted to controlling, more to controllers. This year it is about digital stress with its facets and effects and how to reduce and manage it.

Of course, a highlight will also be set in 2023 with presenting the ICV Controlling Excellence Award as part of the Congress. Finally, the winning team provides exclusive insights into a successfully implemented controlling project and thus gives visitors of the meeting in Munich further tips and food for thought for their own professional practice to take home with them.

Networking with the who's who in European controlling

Numerous **exhibitors** enrich the offer on-site. They present controlling-relevant products and services in the foyer of the Westin Grand Munich Congress hotel. **Atvisio Consult**, with **Workday** - the main sponsor of the ICV Controlling Excellence Award, will be there again with the Managing Director Peter Bluhm to conduct interviews with speakers and controlling personalities for atvisio.tv. **Networking and personal exchange are at the top of the agenda at the expert meeting of the European who-is-who in controlling.** There is plenty of time for this during coffee breaks, at lunch, at Happy Hour including "Meet the Experts!" and of course at the legendary "Controllers' Beer Garden" with buffet and jazz band.

The ICV is looking forward to the face-to-face meeting, for which the corona regulations that will then apply will be observed in order to ensure the health safety of the visitors on site.

About the ICV

The International Association of Controllers (ICV) has set standards for controlling and controllers alike for more than 40 years and is now the address for controlling competence in Europe. The approximately 6,000 members - more than 200 corporate members - benefit from a wide network, central contacts, top-class specialist events, awards for excellent work and more than 60 work groups. These are regionally oriented, dedicated to specific industries or specialist topics. The Association brings together theory and practice, trends and proven, specialist know-how and skills and thus offers a complete range of services for controllers, CFOs and everyone who focuses on controlling and corporate management.
